

## Definitions

SAACPSA value added: SAACPSA value added consists of SAACPSA output minus SAACPSA intermediate consumption (for example, costumes rented by performing arts companies or printing of the program for the show).

SAACPSA employment consists of all wage-and-salary jobs where the workers are engaged in the production of SAACPSA goods and services.

SAACPSA compensation consists of the remuneration (including wages and salaries, as well as benefits such as employer contributions to pension and health funds) payable to employees in return for their SAACPSA work during a given year.

Core SAACPSA industries are originators of ideas and content associated with the creation of arts and culture. 'Supporting' industries produce and disseminate arts and cultural commodities.

Location quotients (LQ) measure an industry's regional concentration of value added, employment, or compensation relative to the U.S. industry's share. For example, an employment LQ of 1.2 indicates that the state's employment in the industry is 20 percent greater than the industry's national employment share. An employment LQ of 0.8 indicates that the state's employment in the industry is 20 percent below the industry's national employment share.
